NLP is the transformational technology that helps you do whatever you do BETTER!

What is NLP? NLP or Neuro-Linguistic Programming is a transformational psychology field started in the 70s by John Grinder and Richard Bandler. John and Richard modeled 'patterns of excellence' in business, sales, leadership, health, personal and professional development, etc. They modeled experts who consistently got exceptional results in their area of expertise. They then turned these 'patterns of excellence' into 'step by step' procedures and taught the patterns using 'best practices'. The outcome - Practitioners of NLP quickly internalize 'patterns of excellence' and duplicate the results of experts. Today, NLPers are modeling and teaching hundreds of 'patterns of excellence' drawn from every field of expertise.
